Gallatin Valley Seed Company, Inc.

303

Key Attributes:

- Early yellow super-sweet corn hybrid
- Excellent early emergence and vigor
- Consistent yielder
- Good cut recovery
- Good disease package

Maturity:

- 1190 heat units to 1st silking
- 1730 heat units to harvest
- Very good harvest window

Plant Traits:

- Good lodging resistance
- Few tillers
- Ear length of 8.5" & a diameter of 2.1
- 16 – 18 rows of kernels
- Ear set height of 20"

Seed Type:

- 4000 seeds/lb
- Yellow shrunken-2
- Deep golden yellow color

Resistance:

- Common rust resistance
- Common smut resistance

Description:

Harvest Gold is a robust first early yellow super-sweet hybrid that has very good early emergence and vigor that yields and recovers well across a wide range of environmental conditions. Harvest Gold possesses an excellent disease package containing the *Rp1-d*, *g* and *i* rust resistance genes, resistance to common smut but is highly susceptible to NCLB and Stewart's wilt. Harvest Gold can be used with most soil applied herbicides and has good tolerance to nicosulfuron "Accent®, Primero® or ADAPT®."
